

SCIENCE OF DERMATOGLYPHIC IS 200 YRS

Dr. HOWARD GARDNER

♦ In 1983 American developmental psychologist Dr. Howard Gardner developed a theory of Multiple Intelligence (MI).
A few years ago a rather remarkable commercial spin off from Gardner Theory became available a product named DMIT which stands for Dermatoglyphics Multiple Intelligence Test.

• The question is not “ **HOW SMART AM I ?** ” But rather “**HOW AM I SMART?**”

♦ 1892-Sir Francis Galton a British anthropologist and a cousin of Charles Darwin, published his book, "Fingerprints", establishing the individuality and permanence of fingerprints.

♦ 1926-Harold Cummins, the Father of Dermatoglyphics and C.Midlo studied all aspects of fingerprint analysis, from anthropology to genetics and embryology perspective. In 1943 he published a book, "Finger Prints, Palms and Soles", a bible in the field of dermatoglyphics.

♦ 1944-Dr Julius Spier Psycho-Analytic Chirologist published "The Hands of Children" he made several significant discoveries especially in the area of psycho-sexual development and the diagnosis of imbalances and problems in this area from the patterns of the hands.

♦ Science increasing performance - Dermatoglyphics, somatotype and basic qualities profile is used for Brazilian Military Athletes.

ABOUT GODDS

"Godds" in India is a joint venture between a Singapore based Company which has been in the field of DMIT (Dermatoglyphics Multiple Intelligence Test) from many years and has network in countries like China, UAE, Singapore, Indonesia, Malaysia, Taiwan & Thailand.

GODDS has its head office in India located in Bangalore and looking at full scale operations across India, Dubai, UK, Sri Lanka and other countries soon.

MISSION OF GODDS

To empower as many individuals as possible with the knowledge of the known and unknown talents and guide them to create a happy and successful society.

DMIT

Dermatoglyphics is the study of fingerprints, palm prints and sole prints. The dermal ridges begin to form around the 13th week of gestation and complete development by the end of the 21st week, and then remain invariable. Each one's Dermatoglyphics pattern is unique and unalterable.

Dermatoglyphics pattern has been accepted as diagnostic tool in these 20 years and Dermatoglyphics has been extended into public research field as dominant science.

Dermatoglyphics analysis is the combination of new computer technology and science (Quantitative analysis), by scanning and comparing the fingerprint patterns, we are able to find out the inborn advantages and give suggestions according to each person's own characteristics with no bias.

DMIT reveals following information about a child or adult

TESTIMONIALS

Dr. Bassapanavar - Author

"This science has a logic and Supportive Evidence. I personally feel that, It is very important to utilize this data and conclusions to the further development of a child, as a successful person in future.

Mr. Ananthesh - Businessman

My kid was earlier stressed and quite due to over burden of class assignments. We were worried about his daily activities. we are thankful to GODDS, after DMIT analysis he was stress relived and started his daily activities with much more enthusiasm and fun.

Mr. Aakarsh Shamnur - Student

"It is good for everyone since it shows one's personality and guides about their strengths and weaknesses and areas to improve".

Mrs. Smita Shashi- Ex Centre Head of Jumbo Kids, Presently Working as Teacher

"DMIT Analysis has a unique concept to identify inborn talent and hidden intelligence in a human being through the medium of fingerprints. Students and individual can find perfect direction of their lives and career through this DMIT analysis. We recommend it to all aspiring individuals & parents to undergo the DMIT Analysis."

Mr. Ajay Nagaotkar - Councillor and HR business.

"The fingerprint scan for Multiple Intelligence assessment tells us about our son's special skills. We've learned how to teach him and how we can help him learn. If the parents and the teacher know a child's strength and weakness, they will know which is the best method to teach or guide him, what particular ability they can encourage further, so that the child can grow up to be a good and capable person."
